

AQUAPHON[®] A 50

Competitively priced, entry level system for professional acoustic water leak detection

Efficient water leak detection for your everyday work.

Efficient prelocation and pinpointing

Use the A 50 receiver for prelocation along fittings or pinpointing on different surfaces – either outdoors or in buildings.

Work an entire week without recharging

A battery charge lasts one working week. This saves you time and maximises your operational readiness.

Fatigue-free work

Its extremely low weight makes the A 50 receiver your perfect companion for long shifts. Simply attach the device to your belt clip.

Even more benefits for you:

See below for
detailed product
information:

- + Take advantage of the brilliant piezo microphone technology for reliable leak detection
- + Customise filters and frequency ranges to suit your hearing
- + Clearly read measuring results on the illuminated display featuring optimised tilt angle and auto-switch display (180° rotation)
- + Select the appropriate product version: with or without radio module (Sewerin Digital Radio)
- + Wireless headphones reduce annoying cable noise and allow you to enjoy complete freedom of movement
- + Simply carry the A 50 receiver in your rucksack or bag

Choose your device

AQUAPHON® A 50

without SDR radio module, for wired headphones

- + Low weight
- + Long battery life

AQUAPHON® A 50 SDR

with SDR radio module, suitable for both wireless and wired headphones

- + All the advantages of the basic device plus wireless sound transmission
- + Maximum freedom of movement when using wireless headphones

System components/accessories for your everyday work

Whether you are prelocating or pinpointing – the right accessories simplify your work and ensure smooth processes.

UM 50 universal microphone

- + Microphone for prelocating along fittings and locating leaks

TS 50 test rod

- + Test rod to connect to the AQUAPHON® A 50 – for prelocation and pinpointing

M 10 tripod

- + Connects to the UM 50 universal microphone

RP 10 resonance plate

- + Records ground-borne sound using the TS 50 test rod, with wind shield

Probe tips (100/350 mm)

- + Connect to the UM 50 universal microphone or TS 50 test rod

Probe tip extensions (300/600 mm)

- + Increases the range of the probe tips – for connecting to the universal microphone or the test rod

F8 wireless headphones, noise protection

- + Lightweight, rugged, splash-proof
- + F8 wireless headphones with integrated hearing protection, also available in a version that attaches to your safety helmet

Charging technology

- + Various models (mobile/stationary) – for workshop, office or vehicle

Carrying solutions

- + Conveniently carry your system in your rucksack or bag

Do you have questions? Call us.

Which AQUAPHON® A 50 model is best suited to your application? Let's talk. Our sales and service team will be happy to advise you on selecting the right model – with or without a radio module – and will support you during commissioning as well as during ongoing use.
