

# ***AquaTest T10***

Your robust test rod for quick pre-location

# **Quickly and reliably find leaks in the water network.**

## **Quickly ready for use**

Receiver and test rod in one. That is why the T10 can be used immediately.

## **Fits perfectly in your hand**

The sophisticated ergonomics facilitate your work.

## **Extremely high sound quality**

High-quality microphone technology and perfectly coordinated electronics make it easy to evaluate leak noises accurately.

## Even more benefits for you:

- + Stay on top of things at all times with the digital measurement value display
- + Silently activate the measurement using the integrated sensor field
- + Flexibly adapt the measurement to your surroundings – with 8 pre-set filter levels
- + Available with or without SDR module (Sewerin Digital Radio) for use with wireless headphones – you decide

## Choose your model

### **AquaTest T10**

no SDR radio module,  
for wired headphones

- + Operated using sensor field
- + Extremely good noise visualisation thanks to filter options

**AquaTest T10 SDR**  
with SDR radio module,  
suitable for wireless and  
wired headphones

- + All advantages of the base device, plus wireless noise transmission
- + Maximum freedom of movement when using wireless headphones

## Accessories

More efficient pre-locating with original Sewerin accessories.

### F8 wireless headphones noise protection

- + Wireless, lightweight, featuring integrated hearing protection, splash-proof, also available in model to attach to helmet

### M10 tripod

- + For recording ground noise

### RP 10 resonance plate

- + For recording ground noise, with wind shield

### Probe tips (100/350 mm)

- + Connects to the AquaTest T10 – for pre-locating leaks on fittings

### Probe tip extensions (300/600 mm)

- + Increases the range of the probe tip – to connect to the AquaTest T10

### Chargers

- + Different models (mobile/stationary) – for workshop, office or vehicle

## ***Do you have questions? Call us.***

Which AquaTest T10 model is best for your area of use? Let's talk. Our sales and service team will gladly help you select the right version – with or without radio module – and will support you during commissioning and when in use.
